

Web pages with original circuits and descriptions

<http://www.bowdenshobbycircuits.info/>

Many circuits with explanation and schematics. Very old-school design and he puts lots of circuits on the same page which makes navigation a bit hard.

<http://www.techlib.com/electronics/index.html>

Lots of free electronic circuits with schematics and good explanations of the circuits. Some of the circuits are crammed together on the same page but navigation is still ok. I get the feeling that this guy know what he is talking about.

<http://www.zen22142.zen.co.uk/schematics.htm>

A good collection of electronic circuits with schematic and description. Some links to external circuits. Ok to navigate page.

<http://ludens.cl/Electron/Electron.html>

A page with circuits that include schematics, long descriptions and some pcb layouts.

<http://members.shaw.ca/roma/>

Some circuits and explanation. But hard to navigate and messy layout.

<http://users.otenet.gr/~athsam/>

This page has many circuits with schematics and explanation, but some of the circuits only have Greek text..

<http://www.electronics-lab.com/projects/index.html>

This page offers simple navigation and a couple of hundred circuits of different kinds. The circuits include schematics, description and some of them also includes pcb layout.

<http://www.schematicsforfree.com/>

A page that contains lots of files with schematics and description on different types of circuits. A lot of the files are scanned documents from old magazines. This is not the first place I would go search for schematics for a project, but there might be some gems here if you take the time to browse through the files.
